

District Project Spotlight:

Supporting Lions Camp Dorset

Lions, this year we're coming together to support Lions Camp Dorset, a place that gives dialysis patients and their families something priceless—a real vacation with the medical care they need right on site.

What It Costs to Help a Camper

A **week at Camp Dorset** includes a fully equipped cottage or efficiency unit for dialysis families. Approximate costs are:

- **Cottage (3–6 people): approximately \$450/week**
- **Efficiency unit (1–2 people): approximately \$280/week**

These amounts are often out of reach for families already managing the financial strain of chronic illness. Sponsorships from Lions clubs help ensure more families can enjoy a week of rest, connection, and fun.

Boat/Motor for water safety/rescue

We would love to support another item of the camps Wish List – a small motorized boat! We believe that having a dedicated motorized safety boat would allow them to provide even faster assistance when needed.

District has received a quote of **\$6000.00** which include the following details.

- **A 14-foot aluminum boat suitable for safety and rescue operations**
- **A 9.9 HP Mercury outboard motor**

The goal is to have the boat delivered and ready for use by May 2027 in time for next years camp season.

How Your Club Can Help?

- sponsor a camper week,
- contribute toward the new equipment, or
- Host a fundraiser to support operational costs

Every dollar makes a real difference for families living with kidney disease.

Thank you for showing what it means to be a Lion—lifting others up through compassion, community, and action.

In service and friendship,
Jim Rice
District Governor
